

ANNA INOZEMETS

FRONTEND DEVELOPER

I am highly motivated with a strong background developer: 150+ tasks close to commercial using React/JS/TS/HTML/CSS/Node.js, 300+ algorithmic tasks, an experience in code review, working in a team on GitHub, working with Figma or design UI on my own. Nevertheless, I am ready to learn any other technologies. I have achieved places in various competitions at both the national and international levels. It can prove my motivation to earn knowledge and experience. I have worked as a visual programming tutor and an English teacher, so I have an ability to effectively communicate and educate others. In general, I am a driven individual with a passion for learning and educating.

📍 Cherkasy, Ukraine

Ready to work remotely

SKILLS

- React.js, TypeScript, JavaScript
- HTML5, CSS3, SASS (SCSS)
- BEM, Pixel Perfect
- Bootstrap, Bulma, Material UI
- Photoshop, Figma
- Fetch, REST API, SQL, PostgreSQL
- Git/Github, DevTools, NPM, Trello/ClickUp, Agile/Scrum
- Node.js, Sequelize, Express
- Basic OOP understanding, Turbo C understanding
- Algorithms (solved 300+ tasks)
- English - Upper-Intermediate

EDUCATION

Odesa Polytechnic National University

Pharmaceutical Technology | Sep 2020 - Jun 2024

Cherkasy Specialized School №3 (direction - foreign languages)

Graduated: May 2020

Received a gold medal, ZNO (Ukrainian language, chemistry) - 190+

WINS IN COMPETITIONS

- Infomatrix (computer science (CS)) - international - 3rd place
- Ecosoft, "Vesela Nauka" (CS) - national - 1st/2nd/3rd place
- Tech congress "ETEVK" (chemistry) - international - 3rd place
- Water Prize, Intel Eco (chemistry) - national - 2nd/3rd place
- Olympiad (math, CS, chemistry) - regional - 2nd/3rd place
- NASU (chemistry) - city, regional - 1st/2nd place

RELEVANT EXPERIENCE

Frontend developer

Dec 2022 - Present

Responsibilities

- 500+ hours of coding practice
- Development of 150+ tasks, 300+ algorithmic tasks
- Web development by creating pages of responsive design, user experience, and web accessibility principles
- Web development using UI libraries
- Building and deploying server using Node.js, Express.js
- Applied the MVC software design pattern in server setup
- Setting up and managing databases using Sequelize ORM
- An experience leading and collaborating with team
- An experience of working with a team on GitHub - resolving conflicts, merging branches
- Improving code quality by code review

ADDITIONAL EDUCATION

- Mate Academy – fullstack course including Git, HTML, CSS, JS, TS, React.js, Node.js, SQL
- FreeCodeCamp – HTML, CSS, JS articles
- Reactjs.org – React.js articles
- Codewars – 150+ kata completed
- Prometheus – basics of Web UI development
- YouTube channels – WebDesign Master, From 0 to 1, itProger

PROJECTS

Shop of Phones – team project (my role – team lead developer)

Links:

- [Demo link](#), [GitHub Frontend](#)
- [Server link](#), [GitHub Backend](#)

Technology stack:

- React.js, React Router (v6)
- TypeScript, JavaScript
- HTML, SASS (SCSS)
- Fetch API
- Node.js, Express.js
- Sequelize ORM, Neon DB

Planning App – solo React project

Links:

- [Demo link](#), [GitHub](#)

Technology stack:

- React.js, TypeScript, JavaScript
- Fetch API
- HTML, SASS(SCSS), BEM

Art Museum Landing Page – solo project

Links:

- [Demo link](#), [GitHub](#)

Technology stack:

- JavaScript
- HTML, SASS (SCSS), BEM

PREVIOUS EXPERIENCE

Visual programming teacher

Jul 2022 – Nov 2022

Responsibilities

- Explaining the material, delivering lessons to students, using presentations, discussions, and a lot of hands-on activities
- Giving a basic understanding of algorithms and principles of their work
- Teaching of creating programs by manipulating graphical elements rather than writing code in a traditional text-based language
- Creating additional curriculum materials such as lesson plans, presentations, games, and some other resources that will help to understand
- Mentoring students, helping with realizing students' ideas into projects
- Providing additional lessons for students who need more information and support
- Facilitating the development of students' soft skills through interactive team-building games and project presentations in groups, helping students to build their communication
- Providing regular feedback and support to students and their parents for supporting in stable development of students' skills

English tutor

Jul 2022 – Nov 2022

Responsibilities

- Developing personalized lesson based on each student
- Delivering engaging lessons which provide improvement of English and pleasant mood
- Developing activities and exercises that focus on grammar, vocabulary, reading, writing, listening, and speaking
- Monitoring progress to measure language proficiency and track improvement over time using quizzes and games
- Incorporating technology using online resources, interactive activities, games, cartoons to better focusing student attention.
- Building confidence at English and breaking barrier in students' mind
- Creating a positive learning environment with cheerful atmosphere to learning english
- Keeping up-to-date – reading a lot of additional material to improve quality of lessons and my own knowledge
