## Projects & Case Studies

### UX/UI Design For Rectuiting Agency

June, 2023

- Designed website concept for the agency to tell more about their company, stages of work and services. And also for potencial clients which can find employees, or candidates can find job and submit their resumes for current vacancies.
- Before creating the design, I did a competitor analysis and created an information architecture of the website, for better understanding of navigation and after that selected references.
- Created wireframes, UI Kit with components and variants, clickable prorotype and UI Design.
