

# Halyna Bychek

## UX/UI designer

### Summary

I have been passionate about UX/UI design for over 2 years and have 1 year of experience as a freelance designer. I have completed specialized courses in UX design from Skillbox and UX/UI design from DAN.IT and I have successfully worked on various projects. I have a strong ability to collaborate with designers and developers as part of a team.

### My projects

**LMS system for school** - improves communication between teachers and students, making learning more effective both online and offline.

My role: Conduct research, create personas, user stories, user flow, information architecture, wireframes, and design the necessary elements.

**Redesign website** - Redesign for flower shops, aiming to increase sales volume, enhance user experience, and attract new customers.

My role: Conduct a review of an existing website, study competitors, identify the necessary features that will help increase sales on the site.

**Mobile App** - Easy-to-use application of a restaurant in which the user can quickly order and receive their lunch anywhere in the city.

My role: Conduct research; create personas, user flow, information architecture, page wireframes, and create illustrations; design pages into appropriate user flows.
