ABOUT ME

As a well-motivated web developer, I am eager to explore new professional opportunities. My **passion for Math and Algorithms** began during my high school years when I participated in All-Ukraine Math Olympiads and achieved great success. Thanks to my **outstanding Olympiad performance**, I was accepted into university, where I earned my degree as a financier. With extensive experience in **JavaScript, Typescript, React, Angular, HTML, CSS, SQL, Node.js, Express, PostgreSQL, Postman**, and I am ready to learn other technologies. Moreover, my **background in databases and accounting** taught me a **keen eye for details** and a commitment to **meeting deadlines**. As a stress-resistant individual, I am able to **stay patient even in challenging situations**, which I attribute to my accounting experience. I can describe myself as a **result-driven** person that takes a direct approach to achieve tasks and objectives. I have the ability to solve problems and am ready for new challenges, learn and develop.

LANGUAGE

English ----- Upper-intermediate

UNIVERSITY

Lviv Polytechnic National University

2005 - 2010

Faculty of economics, financier (specialist)

EXPERIENCE

FRONTEND DEVELOPER

2022 - Present moment

- Led a team of developers as a tech lead.
- Estimate and debug code
- Set up database using Sequelize ORM
- Develop CRUD (Create, Read, Update, Delete) endpoints for the server to interact with the database
- Implemented an MVC (Model-View-Controller) architecture
- Created user-friendly web pages. I know how to work with ready-made layouts (Figma, Avocode, Zeplin), but if there is no layout, it is not a problem either, I will use Material UI, Bulma, Bootstrap. Also, if the layout does not include a tablet/phone version, I will propose my version
- 700+ hours of coding practice
- 250+ algorithmic tasks solved

Portfolio on [GitHub](#).

Technologies: JavaScript, React, Typescript, HTML, SCSS, BEM, Node, Express, PostgreSQL, Postman

SQL DATABASE ADMINISTRATOR

2020 - 2021

Company: Strans

- Creating complex SQL queries to analyze company data for statistical analysis, leading to informed and profitable business decisions
- Provided user support and managed user access and permissions on a private platform
- Identified and corrected minor bugs in AngularJS markup
- Developed and optimized SQL scripts to ensure efficient and reliable database performance

ACCOUNTANT

2015 - 2019

Company: Yablunevuy Dar

- Processed and analyzed large volumes of data to prepare timely reports for production, never had any issues or delays
- Calculated and implemented the cost of a new product, which is still used as a standard model for further calculations
- Led the integration of employees to a new communication channel, introducing an efficient scheme of communication within the company and resulting in a 50% increase in the speed of decision-making and information exchange was accelerated by 2 times

SKILLS

- Typescript, JavaScript (ES2015 - 2019)
- React, Redux
- Angular basic knowledge
- HTML5, CSS3, Sass (SCSS), BEM, Bootstrap
- Node, Express
- Fetch, REST API
- PostgreSQL, Postman
- SQL basic knowledge (Microsoft SQL Server)
- Figma, Avocode, Zeplin
- Git/Github, VS Code, Chrome Developer Tools (incl. React), NPM, Webpack, Trello, Jira
- Agile, Scrum
- Algorithms:
 - solved 250+ tasks, on the private Mate platform
 - reached 5th rank on [Codewars](#) 100+ completed tasks
- Basic of OOP understanding

PROFESSIONAL DEVELOPMENT

MATE ACADEMY

Fullstack course

2022 - 2023

LOGOS IT ACADEMY

Frontend course

2020 - 2021

REACTJS.ORG
HTML ONLINE COURSE
W3SCHOOLS.COM
CODEWARS [RANK 5 KYU]

MY PROJECTS:

• LANDING PAGE FOR BOSE

The page with adaptive markup, a burger menu, grid layout, and animation

[DEMO](#)

[GITHUB CODE](#)

• ORGANIZER APPLICATION

The application has the ability to load data from an API and add tasks to the list with validation. Users can also toggle and rename tasks, as well as delete them. Additionally, the application provides notifications about any errors that occur during its use.

[DEMO](#)

[GITHUB CODE](#)

• LISTS OF POST APPLICATION

Mini application that allows users to load data from an API and add or delete comments with validation

[DEMO](#)

[GITHUB CODE](#)

• ONLINE SHOP (TEAM PROJECT)

In a team project for an online shop, I developed an adaptive markup, implemented a burger menu, created a grid layout, and added animation. Additionally, I created a custom database and integrated it with the project, loading data from it to the website.

[GITHUB CODE](#)

ACHIEVEMENTS

- Earned admission to the university through exceptional performance in Math Olympiad competitions, demonstrating outstanding problem-solving and analytical skills.
- Designed and implemented a cost calculation scheme for new products that incorporated a detailed analysis of production capacity and equipment capabilities, resulting in significant cost savings and improved profitability.
