## Summary

Hi, my name is Slava, I'm 23 and live in Ukraine. I'm an ISKA kickboxing world champion, but now I'm a front-end developer. I want to achieve the same success and in development I really like it.

Successfully completed web development courses at Merga Academy. In our homework we used HTML, CSS, SASS, GIT, Storybook, Javascript and React and other js libs.

## Projects

- [Criptoriance](#)

Landing page with beautiful design, svg animation, slider. There is also a mobile version. Use HTML, SCSS, BEM, vanilla JS for tabulation, library AOS for scrolling animation

- [Linear](#)

Landing with attractive design. Use HTML, SCSS, mixins, BEM, JavaScript for implementing popover and smoothly appearing animation when scrolling. The slider was made using the library Swiper

- [Todo list](#)

To-do list app. Used bundler Vite, React, used hooks also for comfort, our own custom hooks were created, save data in localStorage. Styled with css-modules and library clsx. Used for type checking library PropTypes. Used the library framer-motion to smoothly add and delete tasks

- [Recipes](#)

Recipe app. Used bundler Vite, React, used to switch react-router-dom, recipe API. Styled with css-modules and library clsx. Used for type checking library PropTypes.
