### EDUCATION

Archiviser - 3d Visualizer  
2017-2022

Mate Academy - UI/UX designer  
2022-2023

### SKILLS

- Figma
- Adobe XD
- Adobe Photoshop
- Adobe Illustrator
- Framer
- 3ds Max

### PORTFOLIO

[Behance link here](#)

I believe that my portfolio demonstrates my skills and experience as a UI/UX designer and showcases my ability to design effective and user-centered solutions.

I welcome any feedback or questions and look forward to the opportunity to discuss my work with you further.

### About

As a UI/UX junior designer with 1 year of experience, I bring a fresh perspective and a strong passion for creating engaging digital experiences. During my time as a UI/UX junior designer, I have had the opportunity to work on a variety of projects, including mobile apps, websites, and software interfaces.

I am experienced in conducting user research and usability testing to inform design decisions, as well as collaborating with cross-functional teams to ensure a seamless end-to-end user experience.

My ability to communicate effectively, both verbally and visually, and my eagerness to learn new skills make me a valuable asset to any team. I am excited to continue growing as a UI/UX designer and to contribute my skills to creating innovative, user-centered designs.

### Experience

I completed Mate Academy's UI/UX design course, where I gained a strong foundation in design theory and practice. The course covered a range of topics, including typography, color theory, wireframing, prototyping, and user testing. Through a series of real-world projects, I gained hands-on experience designing user interfaces and user experiences for a variety of digital products.

By using my own ideas and creativity, I was able to create designs that stood out from the competition and provided a memorable user experience. I am always looking for new and innovative ways to approach design challenges and am excited to continue exploring my creative potential as a UI/UX designer.

### UI Design

I am proficient in several design tools including Figma, Framer, Adobe Photoshop, and 3DS Max. These tools enable me to create high-quality designs for a variety of digital products and platforms.

In Figma and Framer I have experience creating high-fidelity designs for websites and mobile apps. I use these tools to create detailed designs that effectively communicate the client’s vision and brand identity.

I use prototyping and animation features to create interactive and engaging UI. These tools enable me to create interactive prototypes that simulate the final product and provide clients and stakeholders with a realistic preview of the final design.

In 3DS Max, I am able to create 3D models and renderings, which is particularly useful for designing complex products such as architectural models and gaming environments.

### UX Design

I am passionate about creating user-centered designs that effectively solve problems and meet users' needs. To achieve this, I have a strong understanding of user research and usability testing, and I am experienced in applying these principles to my design process.

In my previous experience, I have conducted user research through a variety of methods such as surveys, interviews, and user testing sessions. This has allowed me to gather valuable insights into users' needs, preferences, and pain points. I use this information to inform my design decisions and ensure that the final product meets users' needs and expectations.
