SUMMARY

I am a meticulous UX/UI designer with experience in graphic design.

I have **commercial experience** in website creation and redesign and possess advanced skills in **Adobe Photoshop**, allowing me to handle high-complexity level tasks. I was awarded a **study grant** in the "IT Generation" national program.

I have **rebuilt the architecture of pages**, organized their content and UX components, **changed logos**, and updated the overall style to eliminate outdated elements. I strive to create a modern and visually appealing look with a minimalistic and user-friendly UX.

In addition to website design, I have also worked on **mobile apps and online tools**, and I am proficient in the **entire design process**. As a freelancer, I have designed numerous **posters, billboards, flyers, logos, and business cards**.

EXPERIENCE

UX/UI DESIGN 2022 - Present

- **Researching, interviewing, and analyzing** the gathered information;
- Preparing and designing the UX and UI parts of the **smart home app**;
- Designing the **reference sorting tool** and implementing new features in this type of tools;
- **Redesigning** the wedding dresses site (currently being on the implementation stage);
- **Creating** the landing page according to the customer's technical requirements and materials.

GRAPHIC DESIGN 2011 - Present

Designing advertisements, posters, billboards, flyers, logos, business cards, etc. (including corporate style based) for gyms, sports events, clubs, and individual needs (self-employed)

PHYSICAL REHABILITATION SPECIALIST 2009 - 2023
