

# HANNA BOBYR

## FRONT-END DEVELOPER

### PERSONAL PROFILE

Having successfully completed the Front-End Developer course at DAN.IT education, I was most interested in React.js. Creating an application that has multiple functions, and each function or component is interrelated to each other using different tools, gives me pleasure and motivation to learn new technologies and practice my technical skills.

### EXPERIENCE

#### VTORMALL - VIEW WEB PAGE

code: [https://gitlab.com/vmudrij0508/fe\\_3\\_final\\_project](https://gitlab.com/vmudrij0508/fe_3_final_project)

9 people participated in the creation of the project.

VtorMall is a large platform for buying and selling recycled materials at favorable prices.

#### STEP PROJECT CARDS - VIEW WEB PAGE

code: <https://gitlab.com/bykoua/step-project-cards>

Three people participated in the creation of the project.

An application where the Secretary can create, edit and delete cards describing scheduled visits to doctors.

#### STEP PROJECT FORKIO - VIEW WEB PAGE

code: <https://gitlab.com/bykoua/step-forkio>

The project was performed by a team of 2 people. The layout is made taking into account the principles of adaptive layout. The project was made using Gulp

#### STEP PROJECT THE HAM - VIEW WEB PAGE

code: <https://github.com/HannaBoby/theHam>
