

KATERYNA BEREHOVYCH

Junior Front-End Developer

Hello! My name is Kateryna. I was an accountant and I worked with numbers long time. But I understood that I wanted to develop and create something new and interesting. Obviously, numbers help me do it! I saw it when I had been studying at GoIT.

At IT-school I felt that it was my field. I can learn quickly and it is interesting to solve different tasks and problems. During studying I got knowledge of HTML, CSS, JavaScript, React, React Native. In addition to this, I have an experience with implementing both individual and team projects. Now I am looking for an entry-level position and I am ready with a huge wish and pleasure to start working at your company!
