## **Intro:**

I'm a react front-end developer, highly passionate about being a professional in everything I do. By now I've managed to try this out, running my own business. I like my code clean and tested (I like documentation, that cannot be outdated - clean code). Currently I'm interested in web development to build interactive elements based on UI components.

## **Experience:**

### **Freelance, Front-end developer**

March 2022 - Now

- Cross-browser and adaptive development of dynamic and interactive pages;
- Basic JavaScript / ES6 Applications;
- Working React base front-end application;
- Working with vector graphics in SVG format;
- Optimization of HTML pages, layout validation;
- Work and configuration of ready-made solutions (plugins) on jQuery;

### **Entrepreneur**

March 2015 - December 2022

- New business development;
- Enterprise Management Systems;
- Sales management;
- Analytical skills;
- Work with the documentation;
- Logistics setup;

## **Courses:**

- December 2021 - January 2022: Online course of HTML, CSS ([udemy.com](https://www.udemy.com/));
- March 2022 - August 2022: Full course of JavaScript + React ([udemy.com](https://www.udemy.com/));
