Work experience

Coolorca

Apr 2023 – May 2023

PHP developer

In CoolOrca startup I was developing new functionality on marketplace on laravel (from recent tasks i added functionality to edit banners on main page, adding and editing photos of product, website frontend optimization, images compression and converting to modern extensions, division of authorized sellers on groups and changing admin functionality according to seller group etc). Our repo was in gitlab.

Locomotive

Jun 2022 – Apr 2023

PHP Developer

Worked in company "Locomotive" as developer I was doing integrations with the company custom seo client, some seo improvements, generating meta information on client's websites and improve/refactor custom client code.

Company has it's website on Laravel i was working on, adding new features (pages, admin functionality and handling API).

While working with seo client i practiced with OOP principles like abstraction, inheritance, encapsulation.

Also we developed websites for out clients using Laravel.

Examples of projects: <https://justbuy.com.ua>, <https://www.24print.ua/>

Previous experience

1 year experience as PHP, Node.js/React developer on freelance.

Several projects on Node.js + mongodb:
