## Profile

I am a fronted developer with strong skills in HTML, CSS, and JavaScript, and experience with React framework. I specialize in responsive design principles and optimizing for various devices and screen sizes. Additionally, I possess excellent communication skills and am comfortable working with cross-functional teams to meet project deadlines and deliver exceptional results.

## Employment History

### Frontend developer, Codexy Software, Remote

NOVEMBER 2021 – APRIL 2023

As a front-end developer, I had the opportunity to work on frontend part of eCommerce Ruby on Rails and Jango applications. I worked closely with the design and backend teams to ensure that the website was consistent with the business's branding and was easy for customers to navigate. I used my skills in HTML, CSS, and JavaScript to create a responsive and visually pleasing website. I used various tools to analyze the website's speed and optimized the images, refactoring CSS and JavaScript files to improve the website's loading speed. I also gained experience in developing HTML emails and adapting them to different email clients and I also had the opportunity to work on integrating the websites with third-party services, such as google services.

### Frontend developer, Freelancehunt, Remote

SEPTEMBER 2021 – NOVEMBER 2023

Working as a freelance frontend developer has provided me with a wealth of experience in developing landing websites using HTML, CSS, JS, Gulp and Webpack assembler. Also I gaining valuable experience in client communication and understanding their requirements.
