Oleh Savchuk

Frontend Developer

I am a Frontend Developer with a year of practice and Upper Intermediate English. I've developed projects in JavaScript, Typescript, React, HTML, CSS, Preprocessors, and BEM. Also, I have a good knowledge of adaptive and responsive web design approaches because I've created an e-catalog of mobile devices. Ready to learn and work with new technologies such as React Native, Next.js and different CCS frameworks. I'd managed my own business, so I am responsible, flexible, and able to work with deadlines and organize my workflow. Due to my experience, I can easily understand the needs of customers, clients, and colleagues. Ready to manage difficult tasks and find the best solution for improving the product.

Experience

○ July 2022- Present

Frontend developer

Landing page for Dia

Technologies: JavaScript, HTML, CSS, BEM
