Summary

I am a very driven, innovative Software Engineer (Backend) with a passion for building software products that are profitable as well as impactful to the intended users, utilizing a proper architecture that ensures its scalability, reliability and maintainability. I have over 4 years of professional experience in backend development, building and improving products for our clients across Fintech, Edutech, Insurtech E-Commerce by using and staying current with the right technology tools available.

My approach to building software is largely user-centric, hence the technical decisions I make during the development process are optimized to present the best possible experience to the users.

Technical Skills

- Programming Languages: PHP, JavaScript.
- Backend Development: PHP (Laravel), Node.js (NestJS).
- Data Storage & Processing: MongoDB, MySQL, PostgreSQL, Elasticsearch, Redis, RabbitMQ.
- Cloud Infrastructure: AWS, Digital Ocean, Docker.
- Other Skills: Good knowledge of Waterfall and Scrum Agile Methodologies with experience in sprint planning and Kanban.

Career Interests

I have a year plus experience working as an IT Project-Manager with comprehensive experience in customer/client-delivery, project-management, product and operations.

I am a dedicated outside-of-the-box thinker that thrives in creative and innovative environments accompanied with strong communication and organizational skills and can interact at all levels. I am a growing leader and a natural team player that is always eager to learn.
