Profile

Hello there, my name is Murad Sadigov, and I am a 20-year-old student at Eötvös Loránd University.

I am currently seeking a full-time position in Front-End Development.

As a responsible and diligent individual dedicated to continuously improving my skills in Front-End development, I am always seeking opportunities to expand my knowledge and expertise in related fields. Currently, I am actively learning Node.js, which is a popular back-end JavaScript framework used to build scalable and efficient web applications. I hope to enhance my ability to create dynamic user experiences, while also staying up-to-date with the latest trends and best practices in web development.

I invite you to check out my **GitHub** [🔗](#), where you can view my latest projects and contributions.

Thank you for considering me for any opportunities that may arise.
