I am a UX/UI designer, I like to create something new and thus open my creativity, I like complex designs and in general, I love the process of creating a design for the site.

Successfully graduated from courses web designer, platform WAYUP, studied work with Figma, Adobe Photoshop, and Adobe Illustrator. After the course entered the freelance exchange UPWORK worked on projects redesigning the commercial site and non-commercial projects.

I've been on Upwork for 4 months and during that time there were two commercial projects, as well as one non-commercial project outside Upwork.

Online shop plush toys

My task was to redesign the landing page of an online store selling plush toys.

The task was to make the site more childish and attractive while maintaining the color scheme, as well as pick up a combination of fonts. Make the site comfortable for the user.
