SUMMARY

I'm a Junior Fullstack developer. I know HTML5, CSS3, JS, React, Node.js, mongoDB. Worked on several individual and team projects. It is important for me to work with good people and increase my level of knowledge in order to solve new interesting problems. I have also been a team leader several times on team projects, thanks to which I manage my time well and communicate well with colleagues. Always ready to help solve problems and explain exactly what went wrong.

PROJECT EXPERIENCE

Individual:

[WebStudio](#), [link](#)

[HTML, CSS, SCSS, JS]

Website of the WebStudio with an adaptive layout, a modal window and a second PORTFOLIO page

[PhoneBook](#), [link](#)

[React(Hooks, Routers, Redux, Redux Toolkit)]

Contact book application where the user can register and then use a personal collection of contacts. The functions of adding, deleting and filtering by name are present.

Team:

[Filmoteka](#), [link](#)

[HTML, CSS, JS(async/await, local storage)]

A convenient site for finding movies. Also, the user can save movies in two categories: Watched or those he wants to Watch. Role: Team lead.

[YourPet](#), [frontLink](#), [backLink](#)

[Node.js, JS, React, mongoDb, cloudinary, HTML, CSS]

A site about pets. It may be useful if you are looking for a pet or want to find a new home for your pet for free or sell it. The site also provides for registration/login for full use of all available functions. Roles: Team lead of backend, frontend developer
