My name is Yulia. I graduated from the university with a degree in Computer Science. I haven't any work experience yet, but there are other qualitative advantages.

I participated in the development of web pages, and also created a prototype of a mobile application for my thesis. I know several languages: English (Upper-intermediate B2), Ukrainian (native C2), Russian (native C2), also study Croatian.

I have a healthy approach to finding a job, so I agree to the position of an assistant or an intern, the main thing is that there is an opportunity for development. I am ready to fully devote myself to work by investing all possible forces and also follow the rules of the company.
