EXPERIENCE

I've been working with React.js + Typescript on freelance. Also, I've worked as personal frontend mentor(6 months).

Experience with different techs:

React.js + Redux.js - 2 years
bootstrap - 1.5 years
Material UI(MUI) - 1 year
TailwindCSS - 1 year
Next.js - 1.5 years
HTML, CSS - 4 years
MySQL - 1 year
Typescript - 1.5 years
Strapi.js - 1 year
Styled Components - 1 year
GraphQL - 1 year
Express.js - 1 year
Webpack - 1 year
Sanity.io - 1 year
Git - 2 years
Node.js - 1 year
SCSS - 1 year

Top 5 related projects:

- Online library - Next.js + Typescript + Strapi platform that have some type functional. Kind of comments(firestore), auth system([url](#)).
- Three.js generator of geometry by user input([url](#)).
- Products viewer of ecommerce with FakeAPI([url](#)).
- Improve work of ecommerce built on React.js + Styled.Components + Storybook + Stripe. It means, optimization of website, clearing structure of project and adding new features.
- Simple CRUD app that uses MySQL + React. In app we can add new user, delete etc([url](#)).

Additional projects:
