HTML, HTML5, DOM, CSS

\$ knowledge of Angular

#ABOUT MYSELF

At this stage of my life, I confidently perform practical tasks with javascript, I know how to visually create a website page and make its functionality alive. I feel confident in any direction, and I am ready to put in a lot of effort and time to create something special.

EXPERIENCE

FIGMA

I have experience working with various projects and layouts, which are located on the Figma website. This is my first project where I feel in the right place.

I allocate more than 10 hours a day for work, so I consider that time is my only value in which I can show the best possible result and bring the work to the end.

My first motto in life is to do it. I am insanely motivated and want to enter an environment where I encourage myself
